December 3, 2014

Just want to note for the record what a solid job New Belle Construction did for us in the building of our Detox Center:

- New Belle worked closely with our architect so that we started with a design that met our purposes and fit into the existing conditions of our campus.
- Considerable attention was paid to site preparation so that the new building sat on a stable ground.
- Layout of the building and construction of the foundation & concrete got Mr. Kelly's personal attention. I even saw Jim on a kneeboard with a trowel at one point.
- Subcontractors were well chosen and did their work professionally.
- Finish work was up to standard.
- The new building connected to the existing one seamlessly, improving our campus.
- Mr. Kelly managed the schedule well and hit our deadline – kept the job moving in some difficult weather circumstances.
- Costs for this project were well controlled. Jim's progress bills were properly prepared and assisted the control procedure we established.

I recommend New Belle without qualification.

Stephen B. Roman

Chief Planning Officer
