

December 20, 2012

Mr. Jim Kelly
New-Belle Construction
310 Rehoboth Church Road
Belle Vernon, PA 15033

Dear Jim,

Allow me to express my appreciation for your team's assistance and support of our growing family of Corporate Accounts. Butler Builders, like New-Belle, have been instrumental in maintaining the mutual relationships we enjoy with many of the Nation's largest multi-national corporations.

New-Belle Construction has demonstrated a deep respect for the end user's needs and developed creative building solutions. It is your skills and the tireless efforts of Mr. Dean Clark that ensure the Butler Brand stands for a quality building, offering the lowest cost of ownership. You set a high standard in serving the client's needs by going above and beyond the typical construction processes to ensure buildings are delivered on-time, in-budget and beyond expectations.

As an award winning Butler Builder, respected local general contractor, and skilled turnkey design build firm we will continue to refer your firm to corporate clients as a preferred design build contractor. Your support in the Marcellus Play was instrumental in setting sales records within the oil and gas market this year. We expect to see more of the same in 2013.

We thank you and your team for being a loyal and supportive Butler Builder. We understand it is the work of contractors like you that makes Butler the world's bestselling brand of building.

Sincerely,

Mark S. Bartlett
Senior Global Accounts Manager
