To Whom It May Concern:

I am pleased to write this letter of recommendation for New Belle Construction, INC. New Belle recently completed the construction of our new FBO and Hangar at the Allegheny County Airport in West Mifflin.

New Belle provided their services to us in a truly partnership fashion. They were always available to offer suggestions/options as the parameters of the project changed. Building a facility in the aviation industry tends to offer more challenges and complexities than a normal construction project. New Belle's flexibility and adaptability kept the project on track which resulted in a wonderful facility.

Throughout the planning, construction, and wrap up of the project, New Belle's team was engaged and committed to delivering a product that would make us happy, and they did! Jim Kelly is a first class gentleman who is compassionate and caring and it shows in the work that his team delivers. His employees and sub- contractors were also dedicated to the project and it showed in their work performance. Overall, we are very satisfied with the project and I would recommend New Belle without reservation to anyone considering their services.

On behalf of Voyager Jet Center we thank Jim and his team for building our beautiful facility.

Sincerely,

Charles P. Falce

Chief Executive Officer
